

Smartphone Access Link from Mobile Phone (optional)

The real-time access is optimized for tablets and smartphones. It's a fast and safe web access which is very practical on the go. This real time tracking is great for observation or directly tracking objects, if you're not at home on your computer.

1. Contact your supplier, for adding this function and to send you your login data.
2. Click on the smartphone link on the menu in your software:
3. Login with your login data
4. Click on the asset name for a map overview of the current state of this vehicle:
5. The GPS point will be automatically refreshed.
6. If you want to see all your assets again, click on the truck symbol.
