

Sending Orders to Drivers (Smartphones or Tablets) - optional

- [Send Order Mask](#)
- [Send one geofence as order](#)
- [Send more geofences as order](#)
- [Send Orders using the Tour Module](#)
- [Email List](#)
- [SMS List](#)
- [Order Stopp List](#)

The new Sending Orders to Driver features uses email to push orders to the drivers

Send Order Mask

You need to assign a driver to the order before the order text is shown.

The assigned driver must have an email address and additionally an SMS address (in case of SMS notification)

If you want to push the message to the Garmin, the assigned asset must have a Garmin.

The subject will be used as the email header. You can add details in the order message body and add attachments.
